DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15 and 16, drawn to a compound of formula (IV).

Group II, claim(s) 5 and 6, drawn to a monomer of formula (II).

Group III, claim(s) 1-4, drawn to a polymer of formula (I).

Group IV, claim(s) 10-12, drawn to an optical device comprising the polymer of formula (I).

Group V, claim(s) 13 and 14, drawn to a switching device comprising the polymer of formula (I).

Group VI, claim(s) 22-28, 40 and 41, drawn to a polymer of formula (VII).

Group VII, claim(s) 29, drawn to a monomer of formula (VIII).

Group VIII, claim(s) 30-34, drawn to an electroluminescent device comprising the polymer repeat unit of formula (IX) and a luminescent dopant.

Group IX, claim(s) 17-21, drawn to a method of forming a monomer of formula (VI).

Group X, claim(s) 35-39 and 42, drawn to a method of forming compounds of formula (X).

Group XI, claim(s) 7-9, drawn to a method of polymerizing a monomer of formula (II).

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The compounds represented by formula (IV), the monomer precursors, are not novel over the prior art.

Kabir et al., Journal of the Chemical Society, Perkins Transactions 1, (2001), Pages 159-165, teaches on page 160, column 2, compound 15, shown below, a compound meeting the limitations of instant claim 15.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
